Information from Swedish Maritime Administration. Seasonal check of buoyage delayed.

Time: Until further notice

Every spring, the Swedish Maritime Administration carries out major maintenance work to review spar buoys and other fairway markers along the Swedish coast. Due to the cold and persistent ice season, the work is expected to be delayed in some waters. Seafarers are therefore urged to pay extra attention and caution regarding position of floating buoyage.

Mariners who notice that buoyage is out of position are encouraged to contact the Swedish Maritime Administration. Contact information is available on the website: www.sjofartsverket.se
